

In the following picture I run de netstat command 3 times:

- 1.- Before connect any client application
- 2.- After connect a local client (it consumes 2 services)
- 3.- After trying to connect from remote client

```
rmarchena@server:/$ sudo netstat -atun | grep 3700
tcp6      0      0 :::3700          :::*             ESCUCHAR
rmarchena@server:/$ sudo netstat -atun | grep 3700
tcp6      0      0 :::3700          :::*             ESCUCHAR
tcp6      0      0 192.168.1.10:3700 192.168.1.10:58168 ESTABLECIDO
tcp6      0      0 192.168.1.10:3700 192.168.1.10:58167 ESTABLECIDO
tcp6      0      0 192.168.1.10:58167 192.168.1.10:3700 ESTABLECIDO
tcp6      0      0 192.168.1.10:58168 192.168.1.10:3700 ESTABLECIDO
rmarchena@server:/$ sudo netstat -atun | grep 3700
tcp6      0      0 :::3700          :::*             ESCUCHAR
tcp6      0      0 192.168.1.10:3700 192.168.1.10:58168 ESTABLECIDO
tcp6      0      0 192.168.1.10:3700 192.168.1.10:58167 ESTABLECIDO
tcp6      0      0 192.168.1.10:3700 181.25.182.152:62861 ESTABLECIDO
tcp6      0      0 192.168.1.10:58167 192.168.1.10:3700 ESTABLECIDO
tcp6      0      0 192.168.1.10:58168 192.168.1.10:3700 ESTABLECIDO
```
